Button adds tool to available tools

To Do:
 - Create HTML, CSS, and Javascript files
 - Set up a server
 - Code HTML and CSS
 - Create example cards for each section
 - Create buttons and text fields for information
 - Write the Javascript for functions such as buttons.
 - Create GET, POST, and DELETE requests that work with the features created
 - Set up a database to work with the server
 - Seed the database
 - Run tests to make sure the features work as intended
